Reports Summary

Your Reports Summary

This is an overview of your 23andMe reports. It provides brief descriptions of your results but does not provide detailed information that may be important for understanding your results. 23andMe reports do not include all possible variants or account for other factors related to these conditions and traits.

Log into your 23andMe account for more details about each of your results. If you have concerns about your results, talk to a healthcare professional.

Genetic Health Risk Reports 4 highlighted reports of 9 reports available

Learn whether you have specific genetic variants that can influence your risk for certain health conditions. Consider talking to a healthcare professional if you have a personal or family history of one of these conditions or have concerns about your results.

Our reports do not include all possible genetic variants that could affect these conditions. Other factors can also affect your risk of developing these conditions, including lifestyle, environment, and family history.

Carrier Status Reports 0 highlighted reports of 43 reports available

Learn whether you have specific genetic variants that may not affect your health, but could affect your children's health. **Consider talking to a healthcare** professional before making any major lifestyle changes or if you have any concerns about your results.

If you see "Variant not detected" for a Carrier Status report, it means you're not a carrier of the tested variant(s). Keep in mind that while our Carrier Status reports cover many variants, they don't include all possible variants associated with each condition. **So it's still possible to be a carrier of a variant not included in our test.**
